## Education

**Bachelor of Computer Science,** *innovation university*
09/2024 – 07/2028 | 10th of ramdan egypt

## Skills

- Programming Languages C++ Python SQL MATLAB Tools & Technologies : Linux Git & GitHub MySQL VS Code Cisco Packet Tracer Arduino Microsoft Office Computer Science Fundamentals : Object-Oriented Programming (OOP) Data Structures & Algorithms Database Management Operating Systems Networking Fundamentals Problem Solving AI & Development : AI Basics Machine Learning Fundamentals. Soft Skills : Teamwork Communication Skills Leadership Time Management Adaptability Presentation Skills Sales & Customer Interaction

## Certificates

- CCNA: Introduction to Networks — Cisco
- Introduction to Databases — Oracle
- Red Hat Operating System Fundamentals — Red Hat
- Python for R Users — DataCamp
- introduction to Network Security — MaharaTech

## Languages

- Arabic
- English

## Summary

Computer Science student entering the third year with hands-on experience in software development, AI-based projects, databases, and operating systems. Developed multiple academic and practical projects including AI advising systems, database websites, and system-level simulations. Skilled in C++, Python, SQL, MATLAB, Linux, and problem solving, with certifications from Oracle, Cisco, and other technical programs. Experienced in teamwork, sales, and operational support through real-world industrial work environments, with a strong passion for Artificial Intelligence and continuous learning.

## Professional Experience

**Operations & Sales Assistant**
- Assisted in operations management and workflow organization.
- Supported sales activities and customer communication.
- Worked within a team-oriented environment and handled daily operational tasks

## Projects

**Academic Advisor AI (AAAI)**
- Developed an AI-based academic advising system to assist students with academic guidance and decision-making.
- Collaborated within a team environment to design and present the project.
- Presented the project at a university project exhibition and received a participation certificate.
- Technologies: Python, AI Basics

**Deadlock Detection Website**
- Developed a website demonstrating deadlock detection concepts.
- Presented the project at a university exhibition and received a certificate.
- Technologies: HTML, CSS, JavaScript

**ALU, Register & Memory Hardware Project**
- Implemented hardware components including ALU, registers, and memory circuits.
- Presented the project at a university exhibition and received a certificate.
- Technologies: Digital Logic, Computer Architecture

**Database Garage Management Website**
vDeveloped a database-driven garage management website.
- Technologies: SQL, MySQL

## Interests

- Artificial Intelligence & Machine Learning Software Development Problem Solving & Algorithms Technology & Innovation Building real-world projects
